General advice: Immediate medical attention is required. Show this Material Safety Data Sheets (MSDS) to the doctor in attendance.

**Following inhalation:**

Move victim into fresh air. If breathing is difficult, give oxygen. Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance. If not breathing, give artificial respiration and consult a physician immediately

**Following skin contact:**

Take off contaminated clothing and shoes immediately. Wash off with plenty of water for at least 15 minutes and consult a physician if feeling uncomfortable.

**Following eye contact:**

In case of contact may cause irritation, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician immediately if eyes are hurt.

**Following ingestion:**

Do not induce vomiting. Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.

## Section 5 - Fire-fighting measures

**Hazardous Characteristics:**

Flammable liquid and vapour

**Extinguishing Media:**

Dry powder, Chemical foam, Carbon dioxide, water mist.

**Firefighting procedures:**

As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.

**Hazardous combustion products:**

None

## Section 6 - Accidental Release Measures

**Protective measures, protective equipment and emergency response procedures for operators:**

It is recommended that emergency treatment personnel wear air breathing apparatus, anti-static clothing and rubber oil resistant gloves.

Do not touch or cross the leakage.

All equipment used in operation shall be grounded.

Cut off the source of leakage as much as possible. Eliminate all sources of ignition.

The warning area shall be demarcated according to the influence area of liquid flow, steam or dust diffusion, and irrelevant personnel shall disperse from the crosswind and upwind to

the safe area.

**Environmental protection measures:**

Collect the leakage to avoid environmental pollution. Prevent leakage from entering sewers, surface water and groundwater.

**Receiving and removal methods of leaked chemicals and disposal materials used:****Small amount of leakage:**

Collect the leaked liquid in a sealable container as far as possible. Absorb with sand, activated carbon or other inert materials and transfer to a safe place. Do not flush into the sewer.

**Large amount of leakage:**

Build a dike or dig a pit to receive. Close the drainage pipe. Cover with foam to inhibit evaporation. Use explosion-proof pump to transfer to tank car or special collector for recycling or transport to waste disposal site.

**Section 7 - Safety Handling and Storage****Precautions for operation:**

Operators shall be specially trained and strictly abide by the operating procedures.

Operation and disposal shall be carried out in the place with local ventilation or general ventilation facilities.

Avoid eye and skin contact and inhalation of vapors.

See Part 8 for personal protective measures.

Keep away from kindling and heat sources. Smoking is strictly prohibited in the workplace.

Use explosion-proof ventilation systems and equipment.

If canning is required, the flow rate shall be controlled, and grounding device shall be provided to prevent electrostatic accumulation.

Avoid contact with forbidden compounds such as oxidants (see Part 10 for forbidden compounds).

Handle with care to prevent damage to packaging and containers.

Empty containers may retain harmful substances.

Wash your hands after use and do not eat or drink in the workplace.

Fire fighting equipment and leakage emergency treatment equipment of corresponding varieties and quantities shall be provided.

**Storage precautions:**

Store in a cool and ventilated warehouse.

The warehouse temperature should not exceed 37 °C.

It should be stored separately from oxidants and edible chemicals, and should not be mixed (see Part 10 for prohibited substances).

Keep container sealed.  
Keep away from kindling and heat source.  
The warehouse must be installed with lightning protection equipment.  
The exhaust system shall be equipped with a grounding device to conduct static electricity.  
Explosion proof lighting and ventilation shall be adopted.  
It is prohibited to use equipment and tools that are easy to generate sparks.  
The storage area shall be equipped with leakage emergency treatment equipment and appropriate materials.
